

Report on Exposure visit to ISKCON Goshala, Anantapur.

As a part of course curriculum of VLPM-2.0.1 for second year students (2023 batch) on 23.11.2024, the students and Dr. D. Devarajulu (Assistant professor, Veterinary and animal science) visited the ISKCON Goshala, Ananthapur which was maintained by ISKCON for sake of conservation of cows. In this visit, the students were exposed to different types of breeds in cows, types of cattle sheds, types of floors in cattle sheds, types of feed and fodder, types of feed preparation units, types of chaff cutters and FYM storage pits. The students observed the mulching equipments and milk quality check equipments available in the goshala. The students also gained knowledge about the some diseases seen in cows and some medication and preventive measures.
